SUMMARY

Full Stack Developer with **8 months of hands-on experience**, specializing in the **MERN stack (MongoDB, Express.js, React.js, Node.js)**. Proficient in building **scalable**, **user-centric web applications** and managing complete **project lifecycles** from concept to deployment. Successfully developed and deployed **production-ready applications** with **modern UI/UX** and **responsive design.** Skilled in integrating **third-party APIs**, **cloud services**, and **payment gateways.** Known for **creative problem-solving**, writing **clean and efficient code**, and staying updated with **emerging web technologies.**

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern
WebMobril Technologies   *Jun 2024 - Jan 2025*

- **Developed and implemented** the entire **frontend** of a full-fledged **booking application**, delivering a **seamless user interface** and intuitive **user experience.**
- **Integrated PayPal** for secure and efficient **payment processing**, ensuring smooth financial transactions within the app.
- **Collaborated with backend developers** to connect and test **RESTful APIs**, enabling seamless data flow between the **frontend** and **backend.**
- Achieved full **responsive design** across devices (mobile, tablet, desktop), enhancing **user accessibility** and retention.
- **Resolved caching issues** in a **React.js and Node.js** based system, significantly improving **application performance** and **stability.**
- Applied **best practices** in responsive design and optimization to maintain peak performance across all layers of the application stack.

Full Stack Developer
Freelance   *Jan 2024 - Present*

- **Designed and delivered** two custom full-stack freelance projects—a sleek personal portfolio and a dynamic content upload platform—both crafted with modern design principles, secure authentication, and seamless user experience across all devices.

PROJECTS

VibeSphere
Interactive social web application   *May 2025 - Present*
https://my-social-media-nu.vercel.app

Designed and developed VibeSphere, a full-stack social media application inspired by Instagram, using Next.js 15, MongoDB, Zustand, and Cloudinary. Delivered real-time post functionality, user interactions, and a fully responsive, modern UI — optimized for performance, scalability, and user engagement.

DevQuery
Q&A platform for developers   *Jan 2025 - Feb 2025*
https://dev-community01.vercel.app

Developed DevQuery, a full-stack Q&A platform for developers using Next.js, MongoDB, and Appwrite, featuring secure authentication, real-time discussions, and a modern, collaborative interface.

EstateFlow
Property Management App   *Jan 2024 - Mar 2024*
https://developershahapartments01.netlify.app

EstateFlow – A Full-Stack Property Management Platform Built a responsive property management app using the MERN stack, enabling users to list, book, and manage rental properties. Integrated secure authentication, dynamic listings, and image uploads with Cloudinary, ensuring a seamless user experience across devices.

SKILLS

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design
